## Fall Protection for Trucks and Seatainers

Safely Access Trucks of Varying Heights

Folding stairs from Carbis Solutions give your operators safer access to vehicles of all height configurations. The design features a self-leveling tread capability that provides level access to the tops of a variety of trucks heights. Talk to us about how we can help you exceed regulatory fall prevention requirements.

**Our folding stairs are completely customizable to fit your site and platform requirements**

Accessing vehicles of different heights efficiently and safely is critical to your facility's throughput and bottom line. With truck loading products from Carbis Solutions we can make that aspiration a reality.
